Name KNOT CILINDRO D300 H460

Type pendent lamp

ID PC1019

Description KNOT is a collection of stately pendent lights that appose two dramatically dissimilar materials. The design combines coarse natural fibre with smooth, transparent blown glass to arouse a contrast as striking as it is dignified. Full-bodied globes of varying shapes and sizes are penetrated by robust cords that seemingly pull the bottom of the glass inward for a bemusing plastic effect. The LED light source is housed in a handsome top hood, which, like the cord end cap, is fashioned in refined metal. KNOTs are well-suited to both private and public interior spaces and make a particularly impressive statement above dining tables. The collection currently comprises four pendent lights and several colour options.

Technical description The craftsmanship applied in production follows in the centuries-old tradition and experience of master glassmakers. The precision crafting of hand-blown glass instills distinctive, enduring character and outstanding quality in all Brokis products. The glass shades are formed from multiple layers of molten glass, each of which is scrutinized by the master glassmaker prior to being blown into the mold. Up to 70% of the resulting quality is achieved in this stage of production. The metal reflector is manufactured through a unique metal stamping technique that has been proven over the course of millennia and involves spinning cold sheet metal on a rotating form. The history of this technology goes back to Celtic times. As with the glassmakers, the master metalworkers draw upon the tradition and experience that have been carefully passed down through the ages and give the final product exceptional added value.
